

Zip Joint

Zip Joint is an easily installed joint former designed to provide positive control of transverse construction or expansion joints. The two-part assembly is designed to permit removal of the top portion after the concrete has hardened, thereby creating a clean, neatly defined void for application of caulk or sealant when specified.

Cat. #	A	B
1010	1" (25mm)	1" (25mm)
1011	1" (25mm)	1 1/2" (38mm)
1012	1" (25mm)	2" (50mm)
