

## LEED INFORMATION

### WHAT IS LEED?

**Leadership in Energy and Environmental Design** is a certification program of the nationally accepted benchmark for the design, construction and operation of high performance green buildings. LEED serves as a tool for buildings of all types and sizes and works on a point based system where projects earn LEED points for satisfying specific green building criteria. You can find more information at [www.usgbc.com](http://www.usgbc.com).

### BOMETALS AND YOUR LEED PROJECT

**BoMetals, inc.** serves the concrete and masonry construction market by manufacturing a wide variety of products used in commercial and residential construction that complies with the **Materials & Resources (MR)** section of LEED.

- **Regional Materials**
